- React JS
- PHP
- MySQL

EDUCATION

Bachelor's Degree in Global
Business Management at
Regent's University London

Grade: 2:1, 2016

ABOUT ME

Although I wrote my first line of code when I was 13, I followed a different route and got a business degree. Having worked in business related fields for a few years, 2019 became a year when I decided to change my career and focus on what I truly love. I am a self-taught junior developer who is eager to learn new things every day.

Below you'll find projects I've completed that showcase my skills.

PROJECTS

• BookShelf

BookShelf is an app for searching books by title or author. Data comes from Google Books API. This app was built in React JS with React Hooks and React Router. Designed with the use of CSS Grid Layout and Flexbox. All pages are mobile responsive.

• Blog App

Blog application written in PHP with a connection to MySQL database. App has full CRUD functionality. Users can set up profiles, add posts and comments, like other user's posts and see other user's profiles. Password reset function is built with the use of PHPMailer. Designed with Bootstrap. Mobile responsive.
